

Paid Student Placement - Clinical Content Creator

Purpose of the role:

A fantastic opportunity for a high performer to join an innovative and rapidly expanding healthcare consultancy. We are looking to recruit an undergraduate in a life-sciences subject to work as a Clinical / Digital Content Creator to deliver outstanding resources for our clients in the NHS and pharmaceutical industry.

This is an ideal role for someone who wants to gain experience in the healthcare industry and has a passion for communication.

Employer:

Soar Beyond Ltd – www.soarbeyond.co.uk

Soar Beyond is an innovative and dynamic healthcare consultancy. We help our clients make the most out of their investment in medicines and have two main customer groups:

NHS – We provide medicines management services directly to the NHS e.g. teams of pharmacists who deliver advice, medicines reviews and audits to primary care (GPs) to help them make savings and drive up the quality of patient care.

Pharmaceutical industry – We provide consultancy and expertise on how to better align products and solutions to meet the needs of the NHS and drive sales.

Duties and responsibilities include:

- Preparation of content for live training events and support materials for our e-learning programs.
- Creation of content for marketing materials, newsletters etc to promote engagement with our Clinical Pharmacist Network.
- Supporting the creation of corporate digital content for website and social media.
- Involvement in the development process of standard operating procedures and audits.
- Supporting the creation and delivery of materials for sales, marketing, proposals and pitches.
- Assisting with ad hoc requests.

Working hours: 0900 – 17:30 Monday to Friday. Based from home / Hemel Hempstead HQ

Remuneration package: £20,000 per annum pro-rata

Start Date: July 2022

Candidate:

The role requires a professional, self-motivated and pro-active individual who is able to adapt and respond to a fast-paced organisation. The ideal candidate will be a natural communicator, highly organised and be able to work to a consistently high standard. If you are looking to gain invaluable experience of (and exposure to) the healthcare industry and a fast-growing consultancy, then this is the role for you.

Education: 3 A-levels (or equivalent) at C grade or above plus two years of study within a Life Sciences-related degree.

Skills and knowledge required:

- Excellent written / oral communications skills
- A thorough command of MS Office is essential - specifically Word and PowerPoint
- Knowledge of digital content creation
- High attention to detail and extremely efficient
- Capable of dealing with a fast-paced environment, changing demands and tight deadlines
- Able and keen to learn new skills and navigate new systems quickly
- Ability to prioritise tasks
- Must be flexible, hardworking, have a 'can do' attitude and be forward thinking
- Knowledge or interest of healthcare is favourable but not essential

To apply please send your CV to recruitment@soarbeyond.co.uk with a cover email explaining why you think you would be suitable for this role.

Closing Date for applications: 27th May 2022

Placement Student Testimonial

Working at Soar Beyond has been a truly invaluable experience. It has allowed me to develop my academic skills and actively apply them to day to day tasks. This placement has given me an opportunity to be a part of different projects across different departments from Recruitment to Finance. This has allowed me to gain a more in depth understanding on how businesses work.

Seeing the inner workings of the organisation was also very useful in seeing how procedures work in an office environment, as well as understanding the industry and learning from the great experience of senior members of staff. As Soar Beyond is an SME, working here has given me insight into the running of a business I believe I would not have received anywhere else.

The seven months I have been here I have enjoyed working with such an inspiring and supportive team that have moulded me to thrive in this fast-paced environment. This experience has been extremely beneficial in developing both my theoretical knowledge gained at university and has also developed skills that are used day to day from prioritisation to communication skills. As Soar Beyond is a part of the Healthcare sector, I am involved in projects with the NHS and Pharmaceutical firms that have real impact on people's lives. This has given me a huge insight into the Healthcare sector, especially on topics that directly affect our lives such as the recent challenges faced by the NHS.

I would certainly recommend undertaking this placement to students interested in Business and Finance as this placement will allow you to constantly learn and develop. It will also give you the chance to apply and strengthen your knowledge learnt in University. The most valuable part for me was the level of responsibility given to me such as a weekly sales report to the team and survey creation, analysing/graphing the results, trends and presenting the findings which will give me a huge advantage in University projects and future work projects.

Our two previous graduate placement students have gone onto big and exciting opportunities working for large prestigious firms such as Accenture and KPMG. They directly attribute getting the role to their experience at Soar Beyond.
